

TANKTRAXX

100% Guaranteed Compliance

US Tank Alliance removes all of the compliance guesswork from your testing requirements with one automated solution.

With TANKTRAXX, we create a profile based on your equipment and location, and match your unique requirements to our comprehensive database of local, state and federal regulations. This unique system allows us to track your needs and schedule tests according to the ideal timeframe, allowing you to receive the most value for the time between tests. Most importantly, we track any failures and provide all necessary follow up to make sure the system is repaired and retested within the allowable timeframe.

We guarantee your UST systems to be fully compliant. If we fail to conduct a test properly or within the required deadline, you will not be charged for the service and **US Tank Alliance** will pay any penalty or fine.

TANKTRAXX REMOVES THE GUESSWORK

If you are facing any of the following issues, TANKTRAXX is your solution...

“Resolving ‘notices of violations’ is an everyday part of my operation, and sometimes has resulted in fines.”

“My UST database is not trustworthy, causing me to doubt whether I am performing the appropriate tests.”

“If my sites were inspected today, there’s no way I could provide the regulator with all of the required testing documents.”

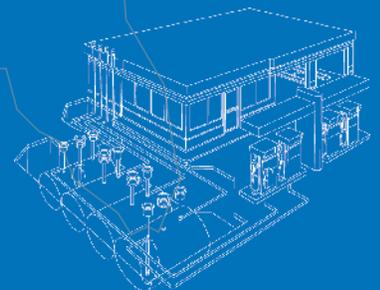

COMPREHENSIVE SYSTEM TESTING

With certifications and expert training in all types of UST testing, **US Tank Alliance** ensures you not only maintain compliance, but continue to operate free of problems. Our reports are guaranteed for accuracy and prompt turnaround. Plus, we respond quickly to emergency calls—24-hours a day, seven days a week.

“The biggest challenge we face is record keeping. We chose to use US Tank because they are dependable and easy to work with. We are very satisfied with all of their services.”
